EDUCATION

University of Waterloo, Waterloo, Ontario, Canada

Honours Bachelor of Mathematics, Computational Mathematics

September 2022 – April 2027 (Current)

Combinatorics and Optimization Minor, Cognitive Science Minor

- Relevant Courses: Designing Functional Programs, Elementary Algorithm Design and Data Abstraction, Tools and Techniques for Software Development, Logic and Computation, Object-Oriented Software Development, Computer Organization and Design, Data Types and Structures, Algebra/Linear Algebra 1/2 for Honours Mathematics, Calculus 1/2/3 for Honours Mathematics, Introduction to Combinatorics, Physiological Psychology, Introduction to Cognitive Science

CORE COMPETENCIES

- | | | | |
|--------------|------------------------|--------------------------|-----------------------------|
| • Front-end | • C/C++ | • Positive Attitude | • Organized/Detail-oriented |
| • Debugging | • CSS/HTML | • Problem Solving | • Time Management |
| • Web Design | • Financial Management | • Teamwork/Communication | • Quick Learning |

PROFESSIONAL EXPERIENCE

Manulife, Remote | Web Developer (Project-Based Opportunity) | May 2023 – July 2023

- Developed a stock tracking web application using React, JavaScript, Tailwind CSS, that allows real-time monitoring and storage of stock data in users' Google accounts via Firebase integration
- Collaborated with a team of 5 to ensure smooth app development, contributing to the app's successful completion and functionality
- Demonstrated adaptability and self-discipline in a remote work environment, efficiently managing tasks, meeting deadlines, and actively engaging in virtual team meetings to align project objectives

Hatch Coding, Remote | Web Developer (Project-Based Opportunity) | July 2023 – August 2023

- Designed and implemented three mini construction progress apps using React, JavaScript, CSS, HTML allowing for tracking tasks and progress in a construction company
- Developed a construction helper app, featuring personal task management and a document hub, empowering individual construction workers to manage their work efficiency and adhere to construction safety protocols
- Successfully completed the learning platform, honing web development skills, including the identification and monitoring of website errors

Toronto Korean Festival (KBCA) | Web Designer | April 2024 – June 2024

<https://www.torontokfest.ca>

- Designed the official website for the Toronto Korean Festival, ensuring a visually appealing and user-friendly interface.
- Integrated responsive design, optimizing for both desktop and mobile users.
- Collaborated with festival organizers to create a cohesive online presence, highlighting event details and sponsorship opportunities.

PROJECTS

Korean Students Association of Canada (KSAC) Website | June 2024 – Current

<https://ksaccanada.com>

Web development of official KSAC website

- Led the IT team in KSAC and developed a user-friendly website using HTML and CSS, providing easy navigation and access to resources for Korean students across Canada.
- Enhanced the site's functionality to support KSAC's mission of fostering networking, shared experiences, and mutual growth within the student community.

Stock Tracking Web Application | June 2023

<https://stock-web-tracker.netlify.app>

Web development of a personal task managing app

- Web application for users to view stocks in their saved stocks pages with login through Firebase authentication and track based on real-time market database
- Developed in a team of 5 and led the front-end part using React and Tailwind and used Jest to implement test cases and perform regression testing/unit testing, and Netlify to deploy the website

Progress Tracking and Reporting Web Application | August 2023

Web development of a task progress tracking app

- Web application for users to view the graph of the progress of completion, adding or removing tasks with adjusting by percentage
- Front-end website built using JavaScript, CSS, HTML, and React and used Netlify to deploy the website

INVOLVEMENT

Korean Students Association of Canada (KSAC) | IT Head | October 2023 – Current

- Fostered networking among Korean students within the Canadian-Korean community through various events, including Canadian university students council meeting, university fairs, and Korean artist performances, significantly expanding their connections
- Managed the KSAC website regularly to ensure visitors could easily access information on upcoming and past events or make inquiries, enhancing user engagement and accessibility as an IT manager

Brain Exercise Initiative (BEI) | September 2023 – December 2023

- Volunteered to help promote brain exercise containing small math, reading, and writing exercises to prevent loss of cognitive function and advocate for people with Dementia and Alzheimer's at Revera Forest Long-Term Care Home

TECHNICAL SKILLS

Programming Languages: JavaScript, Typescript, CSS, Tailwind CSS, HTML, R, React, Python, Java, C, C++, Racket

Technologies and Frameworks:

- REST, Netlify, Jest, Postman, Visual Studio, Git, Github, Microsoft Office Word/Excel/PowerPoint/Outlook, Adobe Photoshop, Figma, Eclipse
- Experienced with REST API in React and Full Stack development, learnt through Manulife's modern web application design co-op curriculum

Additional Skills:

- Strong communication and interpersonal skills developed through volunteering as an assistant instructor at London Children's Museum, Korean Canadian Language Institute, Brain Exercise Initiative
- Outstanding teamwork and cooperative skills established through working on collaborative projects and events
